Tropical Weather Outlook
NWS National Hurricane Center Miami FL
700 AM EST Fri Nov 17 2017

For the North Atlantic...Caribbean Sea and the Gulf of Mexico:

1. Disorganized showers and thunderstorms continue over the central Caribbean Sea in association with an elongated area of low pressure. Strong upper-level winds should limit the development of this system while it generally drifts northward during the next few days. Regardless of development, heavy rainfall is possible over portions of the northwestern coast of Colombia, Hispaniola, and Puerto Rico

through the weekend.

* Formation chance through 48 hours...low...20 percent.

* Formation chance through 5 days...low...20 percent.

Forecaster Cangialosi
